

# UrineFree™ Fast-action, all-in-one odor & stain remover!

Safe for pets, children and the environment.

## The Challenge

Urine is a major problem if not dealt with properly. Even the most effective cleaning agents have a hard time removing urine stains and only mask the smell temporarily.

All urine consists of urea, urochrome and uric acid crystals. Ordinary stain and smell removers cannot touch one of the components - the uric acid crystals. While the water-based components are easy to wash off, dried uric acid crystals lie dormant for a while and resurface smelling fouler in moist conditions and wet weather.

## High-performance Bio-Enzymatic Technology

UrineFree™ eliminates urine smells and stains permanently. It is the perfect remedy for urine created by pets and humans at home and anywhere else! It is not simply a disinfectant; there are many products available for that. The beneficial microbes used in UrineFree™ have been developed specifically to attack the source of the problem- the uric acid crystals.

## Benefits

- Permanent removal of smells and stains
- Instant effect-the smell is gone in minutes
- Cost-effective and environment-friendly
- Works on human and pet urine
- Safe for soft and hard surfaces

## FAQs

### Q. Is UrineFree™ safe to use?

A. It is a safe, mild-to-use remover that contains no harsh ingredients. However, as a precautionary measure, physical contact with the treated area should be avoided until the area is dry.

### Q. Where all can I use UrineFree™?

A. UrineFree™ can be used on porous and non-porous surfaces including hardwood, carpets, concrete, tiles, fabrics, mattresses and bedding. However, we recommend that you try it on a test patch first.

### Q. Can UrineFree™ get rid of old stains and smells?

A. Yes! For old or difficult stains, soak the area with a generous amount of UrineFree™ and cover it with a plastic wrap for 24-48 hours. Then air dry. Repeat if required, until the desired result is achieved.

## The Urine Finder

The Urine Finder is an ultra-violet torch device that helps you find urine patches that cannot be seen with the naked eye. It won't let you miss any spot that has urine and requires cleaning.

Note: Uric acid crystals are visible under UV light only when dry.
